

GROUP PRESENTATION

Instructions: Refer to this handout for the group presentation in **Module 10**. The two (2) groups will be n Group A and Group B. Each group will have specific topics for their presentation. A maximum of 25 minutes will be allotted per group.

Instructions for Group A and Group B

General Instructions: The guide template must be filled out and submitted before the presentation. This serves as the outline for your presentation. All guide questions must be answered and addressed during your presentation.

Format Instructions: Audio-visual aids can be used. Props and unnecessary items are discouraged. The presentation can be in the form of either a thesis report (a PowerPoint presentation is required), or an informative skit/demonstration.

Important Reminders: The focus of the presentation will be the content and organization of ideas. Presenters are only allowed to use formal English language (refer to **10 Handout 2** for necessary terminologies). Do not forget to properly cite and credit the references that you use.

Suggested References: Students may refer to **10 Readings 4** to get a general understanding of the case. Reading additional information is highly encouraged. Remember to choose sources that are credible. Using direct sources such as journal articles is highly recommended.

Topic Distribution

GROUP A. Case of Jesse Gelsinger and Treated SCID Infants
